Some hotels are simply buildings you stay in for a holiday, while others offer up a complete fantastical world that allows you to feel like you've fallen down the rabbit hole. The luxurious Andronis Boutique Hotel is one such dazzling hotel that offers up a sumptuous escape from reality.

Carved into the dramatic crescent cliff of Santorini, the Andronis Boutique Hotel reveals breathtaking views to the infinite blue of the Aegean from every suite. The hotel's multi-level suites capture the lovely vistas over the caldera and the

iconic white-washed houses of Oia. The hotspot of Oia always bustles with a buzzing crowd.

Luckily the Andronis is located levels below the hustle and bustle. It's the perfect location, allowing you to be directly in the city center but also feel quite removed. The result is a beautiful sense of calm in the middle of all the wonderful action.

Private terraces, with Jacuzzi, have hypnotic views of the sea that encourage you to stay all day. The relaxation and temptation of never leaving your room doesn't stop there. Beds are

Tempur-Pedic — you might never want to get up. Luckily the views are spectacular and will encourage you to leave your bed and take advantage of the two heated pools that look directly over the caldera. Andronis Exclusive Group's other three properties are conveniently located close by and offer access to gyms, tennis, and the largest pool and spa in Santorini.

The hotel's Lauda restaurant is overseen by the three Michelin-starred consulting chef Emmanuel Renault. You can select from a six- or nine-course tasting menu, with the option

of paired Greek wine. Have your evening meal at sunset while enjoying panoramic views from the terrace by the pool. As the sun sets, watch the sky turn from blue to pale lavender and the volcanoes vanish into the night's sky.

The Andronis Boutique Hotel is a true place of romance and serenity that will encourage you to relax and disconnect from the hustling outside world.
